Scholarship Essay

Automation has already resulted in a greatly reduced number of workers needed in factories, and with the advent of artificial intelligence, automation is now being introduced into other vocational areas, from relatively low-skilled sectors such as retail and delivery to high-skilled sectors such as medicine and accounting. Based on these trends, some people are predicting a massive loss of jobs in the near future. Assume that you are the Secretary of the Department of Commerce, and you have been asked by the President of the United States to provide a document with the following title: "Roadmap for Maintaining Maximum Economic Wellbeing for All Americans in a Time of Massive Automation."
